

Valencia Loft

The Valencia “Loft” was created for that discriminating individual who relishes the traditional New Orleans architecture in the exterior of their residence but who craves dramatic open rooms, angular ceilings, and a more contemporary lifestyle in their interior. Entering the cathedral-style formal dining room one is awed at the windowed wall complimenting the high ceilings and the cultured marble front fireplace.

The bright garden room, which can substitute as a guest room, opens to an upstairs deck. The dining room, leading to the gourmet kitchen, is highlighted with a palladium window and a 17 foot ceiling. The master bedroom features a vaulted ceiling and a whirlpool bath with vanity and make-up area. A highlighting feature is the upstairs “Loft” overlooking the breathtaking beauty below.
